

User Acceptance Test Case for Virtual Account API

Engineer Name	
Project Manager/BA name & email	
Quality Assurance Analyst name & email	

#ID	Description of the use cases	Endpoint URL	Scenario	Steps To Execute	Expected Result	Any comments or enquiries (Pass/Failed)	Parameters passed during test	Result
1	Generate Token	https://baastest.9psb.com.ng/iva-api/v1/merchant/virtualaccount/authenticate	Token Request Successful	Correct credentials supplied	Successful Response			
			Token Request Failed	Invalid credentials supplied	Failed Response			
2	Generate Static Virtual Account	https://baastest.9psb.com.ng/iva-api/v1/merchant/virtualaccount/create	Static account creation successful	Valid details supplied	Successful response with account details			
			Static Account Creation Failure	Duplicate reference	Reference number must be unique			
			Static Account creation Failure	Invalid value for customer account type, neither dynamic nor static	Unrecognized virtual account type			
			Static Account creation Failure	Invalid value for amount type	Valid amount types are EXACT, HIGHTROREXACT, LOWEROREXACT AND ANY			
3	Generate Dynamic Virtual Account	https://baastest.9psb.com.ng/iva-	Dynamic account creation successful	Valid details supplied	Successful Response with account details			

#ID	Description of the use cases	Endpoint URL	Scenario	Steps To Execute	Expected Result	Any comments or enquiries (Pass/Failed)	Parameters passed during test	Result
		api/v1/merchant/virtualaccount/create						
			Dynamic account creation failure	Duplicate reference	Reference number must be unique			
			Dynamic Account creation Failure	Invalid value for customer account type, neither dynamic nor static	Unrecognized virtual account type			
			Dynamic Account creation Failure	Invalid value for order amount type	Valid amount types are EXACT, HIGHTROREXACT, LOWEROREXACT AND ANY			
4	Reallocate Virtual Account	https://baastest.9psb.com.ng/iva-api/v1/merchant/virtualaccount/reallocate	Successful account reallocation	Unique reference, valid account number used	Success response with account information			
			Account reallocation failure	Incomplete account number to be reallocated	Invalid transaction request-account number to be reallocated			
			Account reallocation failure	Duplicate reference	Reference number must be unique			
5	Deactivate Virtual Account	https://baastest.9psb.com.ng/iva-api/v1/merchant/virtualaccount/deactivate	Account deactivation successful	Unique reference and valid account number	Deactivation successful			
			Account deactivation failure	Incomplete or incorrect account number	Account number to deactivate not found			
6	Reactivate Virtual Account	https://baastest.9psb.com.ng/iva-api/v1/merchant/virtualaccount/reactivate	Account Reactivation successful	Valid account number inputted	Success response			

#ID	Description of the use cases	Endpoint URL	Scenario	Steps To Execute	Expected Result	Any comments or enquiries (Pass/Failed)	Parameters passed during test	Result
			Account reactivation failure	Incomplete or invalid account number	Account number to reactivate not found			
7	Confirm Virtual Payment	https://baastest.9psb.com.ng/iva-api/v1/merchant/virtualaccount/confirmpayment	Virtual payment confirmed	Valid transaction reference and account number	Valid response with transaction information			
			Payment confirmation failure	Invalid Reference	Transaction not found
